

Date: 25.11.2021

Dear Parents,

The health and safety of our students and staff are our utmost priority. We always stand in favor of our students' interests. Students' attendance to physical school has always been kept as optional and will continue to be so.

Incident management protocol is in place. We comply with all measures and guidelines stated by the government regulators. All our teaching and non-teaching staff have been fully vaccinated and periodic testing of staff is being done. Students and the staff wear masks at all times in school. Thermal scanning of all staff and students at entry point is done every day. Hand sanitizers are placed at multiple places on all floors.

Please find below the SOP for COVID19 followed by us.

If any student tests positive after attending school:

- a) The child will not be allowed back on campus until 14 days from the date of the positive test.
- b) The child must submit a negative RT-PCR test before being allowed to restart physical attendance.
- c) Deep sanitization of all classrooms and other spaces will be undertaken immediately on information of a positive test.

If any child shows symptoms while in school:

- a) A dedicated "medical room" is identified for students to be isolated in.
- b) Parents/family members of the concerned child will be contacted immediately to take the child home.
- c) If the child tests positive for COVID19, then steps as above will be followed.
- d) If the child tests negative for COVID19 or improves in health, then he/she will be allowed back on campus once all symptoms have settled.
- e) Students who are well, but who have a family member at home who has tested positive for COVID19, must notify the school and restrict campus entry until 14 days after the positive test of the family member.

Wishing everyone the best of health at all times.

Stay Safe!

Regards,

Dr. (Mrs.) Vandana lulla
Director/Principal
